

Gotta Go Fast!

Sometimes, programmers have the need for speed. We needs fast in and even faster out. If you can't handle our speed, don't even try. To prove that you write fast code, I have this cool string that I am passing in, and I need you to tell it back to me, but I need it fast. How fast can you go? Hopefully faster than 50 ms.

Input Format

The input will consist of a single line of text, s .

Output Format

Your output will be s , but you need to be quick and send it back before the time limit runs out.

Sample Input

Sonic Speed!

Sample Output

Sonic Speed!
